

Vildana Razumova

AI Project Lead

wildanka1@gmail.com • [LinkedIn](#) • Germany, Ingolstadt, 85057 • Have Work Permit for Germany and the EU

Ask my own AI agent about my work: vildanarazumova.github.io/about-me

AI delivery lead and project manager who bridges business teams and AI development and builds the solutions.

10+ years across risk, finance, and e-commerce as an analyst, now designing and deploying AI/ML and GenAI products end-to-end. Most recently built an AI-driven dynamic pricing product for a tour operator end to end: data architecture, ML model, and a GenAI agent in Microsoft Teams. Comfortable owning both the stakeholder side and the technical implementation. MBA + Master's in Data Science, AI & Digital Business from GISMA.

Experience

Fun&Sun: Global Leader in tourism.

Online, Asia Pacific

AI/ML Project Lead (freelance-contract)

October 2025 - present

Designed, built, and deployed AI and automation products end-to-end, owning both stakeholder alignment and hands-on technical implementation.

Dynamic pricing

- Designed and built the end-to-end architecture: multi-source data foundation (MSSQL + ClickHouse) and a two-layer pricing engine (ML + rule-based logic).
- Built and trained the load-factor model (gradient boosting, time-series validation, SHAP explainability) on AS-OF booking curves reconstructed from 100K+ reservations.
- Built an automated signal and monitoring pipeline (n8n): demand signals with LLM-based event classification (Azure OpenAI) and quality alerts to MS Teams.
- Proposed and implemented a "Second Brain" living-documentation standard (architecture, data lineage, feature catalog, onboarding), which makes onboarding fast and handover smooth: a handover to another team took one day.

AI assistants in MS Teams

- GenAI agent (FastAPI + LLM tool-use) for the accounting team: people ask in natural language, the numbers come from database queries, and the model only writes the answer; in production.
- Payments assistant (Dify, Azure OpenAI): answers about 300 staff questions a month from payment data; in production.

Data automation

- Competitor price monitoring through an external data API (Airflow): 8 competitors, three times a day. It freed about 90% of three managers' time; in testing.
- Travel documents service launched in two days with a developer and an infrastructure engineer (I owned the data): documents for 30,000+ travellers in the first 10 days.

Stack: Python · SQL · pandas · scikit-learn · LightGBM · SHAP · MLflow · FastAPI · ClickHouse · MSSQL · PostgreSQL · Airflow · n8n · Azure OpenAI · Dify · Claude Code · NotebookLM

Linde Gas: Global Leader in Engineering & Gas

Munich, Germany

AI Project Manager, Digital Transformation & Adoption Team (6-month contract)

July 2025 - December 2025

Contributed to scaling internal GenAI products at a global industrial company working across product delivery and user research.

- Led end-to-end launch of an internal AI podcast series, from concept and stakeholder interviews to production automation via Power Automate and Synthesia. Zero manual effort post-launch.
- Built foundational documentation for an internal LLM agent, conducted user interviews, translated findings into prioritized feature list with acceptance criteria, and delivered a development-ready roadmap.

Self Development

Ingolstadt, Germany

Moved to Germany due to family reasons.

May 2022 – June 2025

- Enrolled at a German University.
- Achieved B1 level in German.

Chocolife.me: e-commerce, discount service №1 in Asia, 95% market share, 2M clients

Almaty, Kazakhstan

Senior Project Manager and Business Analyst

Sep 2021 – May 2023

Coordinated 2 teams of 7 developers and QAs to improve user experience via data and business process analysis. Went beyond responsibilities and established Scrum processes in the team of 8.

- Reduced tech debt by 60% via negotiated with internal/external stakeholders.
- Saved 350+ working hours monthly for 50+ internal users of the CRM system optimizing 10+ business processes.
- Increased the number of successful payments by 33% via fixing the payment method relevant for 73% of users.
- Arranged backlog of 500 issues and reduced it by 40% via prioritization frameworks.

Halyk Bank: over 100 years, #1 market position in KZ, 11M Retail active clients

Almaty, Kazakhstan

Got hired internally for 3 analytics roles in 10 years. All roles lie across optimization of financial processes and automation business processes.

Senior Operational Risk Manager

Oct 2017 – Sep 2021

Mitigated operational risk events through business process analysis independently or as part of a 2-person team.

- Saved 1,040 working hours annually to 2 employees via automation Loss Event Database with 100K+ events.
- Investigated fraud across 50+ projects by applying Basel's Principles for the Sound Management of Operational Risk.
- Mitigated €1M+ in risks by conducting 10+ scenario analysis across 5+ bank divisions.
- Examined 100+ new banks' products and processes for decreasing potential operational risks.

Financial Data Analyst, Banking Sales

Jul 2011 – Oct 2017

Coordinated workflows and reviewed the financial results of 22 branches and 3000 small sub-branches.

- Automated 10+ reports for payment devices, branch efficiency saved 3+ hours of daily manual work for 1 employee.
- Increased the speed of the approval process by 33% for opening a new sales channel through automation workflow.
- Automated via SAP Analysis & Excel integration 30+ reports across 3 areas for loans, deposits, and bank cards.
